# ANG 19 2004 COMMUNE PRIMING Immunize mice with imported fire ant midgut tissue

### RNA --> cDNA

Isolate total RNA from spleen of immunized mice, prepare cDNA by reverse transcription, amplify by polymerase chain reaction, purify cDNA from gel

ANTIBODY LIBRARY ON SURFACE OF PHAGE Create phage display library expressing 10<sup>6</sup>-10<sup>8</sup> unique antibody Fab fragments

### **DUAL MIDGUT SELECTION**

Two-step absorptions to yield phage displaying antibody fragments specific for midgut of imported fire ants and not native fire ants

# FINAL MICROVILLI SELECTION

Immunohistochemical verification of Fab specific to imported fire ant microvilli cells

## **TESTING**

Test phage/Fab for internalization by microvilli cells of imported fire ants when administered by feeding

IMPORTED FIRE ANT ERADICATION Test phage/Fab/gelonin Conjugate for ability to selectively kill imported fire ants.
